

# Brigand

Lean manufacturing and out sourced design by the big American mass-producing boat builders means most sports boats now look the same. Swap the badges around and you could never tell who made which. You'd feel lost in the crowd. This is why we developed the Brigand. It had to be different, it had to handle like a thoroughbred muscle car, and it had to be big. It had to be a large open bow sports boat with presence.

It's fast, comfortable, impressive and aggressive. Powered by Volvo's classic 5.7 litre V8 giving 320hp and over 45mph. There won't be any mistaking you from the rest of the crowd. The Brigand will pull two skiers, or wake boarders, a parachute or even the kids in a water toy! Fitted out like boats costing thousands of pounds more the Brigand has seats for 8 people, transom shower, swim platform, two sunbeds, wet bar with fridge, electric engine hatch lift, picnic table, stereo radio/cd. If you are really lazy an electric anchor is an option and is operated from the sporty helm. Even the enclosed toilet compartment has an electric flush WC.

Shore power includes a battery charger for the two heavy-duty marine batteries and a 12volt power socket for inflating those water toys!

Overall length is 24ft 4in and beam is 9ft 2in and weight in operational condition is around 2000kg giving a 2700kg tow on a good UK road trailer.

When you're chained to your desk or fed up in a never-ending meeting there's a glimmer of hope that will keep you going – a day with family and friends in your Lema Brigand. It's performance, style and freedom all rolled into one.
