

Lema Duna

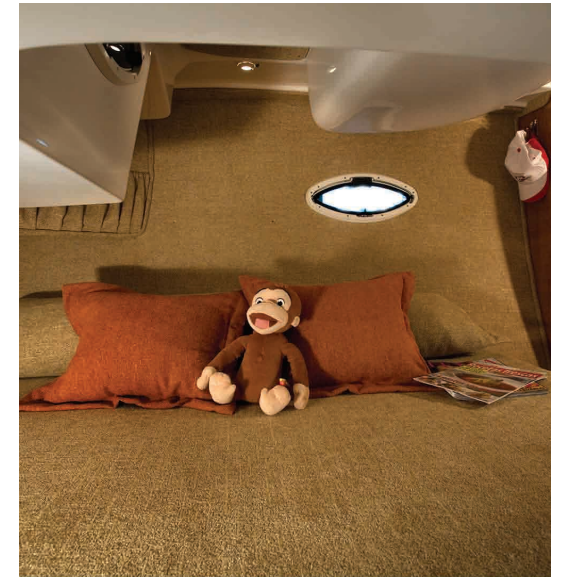

Electric flush toilet

Loads of galley storage space

Privacy door to aft cabin

Lema Duna

This 4 ton twin engine cruiser has a superb design of hull for rough water use and is the perfect long range off shore cruiser, but like all Lema boats its wide walk around decks make it equally at home cruising down rivers where locks need to be used. A single engine version is also available.

As you walk down the Teak steps into the cabin you will quickly come to realise the Duna is something special. No high gloss imitation wood in here, but real wood fashioned by craftsmen.

A spacious aft cabin with comfortable double berth, wardrobe and storage all behind a proper door for privacy. Likewise the heads has a basin, shower, vanity unit and electric flush porcelain WC.

The forward dinning area accommodates 6 people and converts to another large double bed.

Entertain your guests in this lovely area and show off your culinary skills with the galley that includes

a hob, microwave and fridge/freezer. When it's time to retire you'll appreciate the two separate cabin areas and insulated cabin.

The Duna is the largest boat in the Lema line up and the flagship of our fleet. The helm has been designed with long range cruising in mind, the colour chart plotter and sonar are placed dead centre with two sets of engine instruments placed around it. A decent compass is central and the VHF DSC transmitter is easy to reach. It goes without saying the Duna is supplied with an electric anchor, full camper canopy, 220volt shore power with battery charger and UK domestic sockets in the cabin.

There is a spacious cockpit ideal for alfresco dinning, plus sun beds, bow mattresses, a big swim platform, transom shower, boarding ladder, walk around side decks, radar arch, powerful stereo radio/CD/MP3, wet bar, cocktail cabinet and much much more.
